Professional Summary

Full-Stack Web Developer with 10 months of professional internship experience delivering production web applications across the complete development lifecycle – system planning, Figma UI/UX, frontend engineering, REST API integration, QA, and deployment. Shipped 8 commercial client projects spanning retail POS/ERP systems, real estate listings, luxury e-commerce, healthcare, and marketplace platforms, using React, Node.js, Express, and MySQL. Experienced in AI-assisted software development using coding assistants, AI agents, and multiple AI models to accelerate implementation, optimize code, debug complex issues, and build fast, reliable, and secure applications. Comfortable owning a feature from design handoff through production deployment on Linux VPS, Railway, and Hostinger.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend	React 18/19, Next.js 14, Angular (basics), Tailwind CSS, Responsive UI, Figma-to-Code
Backend	Node.js, Express.js (v4/v5), REST API Design, Server-Sent Events (SSE), JWT Auth, Prisma ORM
Databases	MySQL 8.0+, MariaDB, MongoDB, Redis
Integrations	Razorpay, Firebase Cloud Messaging, Shiprocket API, OpenStreetMap Geocoding, EmailJS
AI Development	GPT, Claude, Gemini, Open-Source Models, GitHub Copilot, Cursor, Claude Code, AI Coding Agents
QA & DevOps	Functional/Cross-Browser QA, Postman API Testing, Git/GitHub, Linux VPS, Railway, Hostinger cPanel, Vercel

Professional Experience

Web Developer Intern Jan 2026 – Sep 2026 (8 Months)
Suraise Solutions

- Contributed across the full web development lifecycle – system planning, Figma UI/UX prototyping, full-stack implementation, QA, and production deployment – on 8 client projects.
- Built responsive React/TypeScript/Tailwind SPAs and integrated them with REST APIs and MySQL-backed services, handling complex relational data flows and async state.
- Designed relational database schemas (up to 23 tables) and implemented real-time features using Server-Sent Events (SSE) for live cashier and dashboard updates. **AI Development** GPT, Claude, Gemini, Open-Source Models, GitHub Copilot, Cursor, Claude Code, AI Coding Agents
- Integrated third-party services including Razorpay payments, Firebase push notifications, and Shiprocket logistics across different client platforms.
- Ran manual/functional QA across all shipped workflows and supported staging configuration and production releases.

Backend Developer Intern Nov 2025 – Jan 2026 (2 Months)
Aniweb Technologies (Remote)

- Designed and built RESTful API endpoints in Node.js/Express.js with structured route handlers and request validation.
- Tested API responses, query performance, and HTTP status handling; deployed backend services to Railway, Hostinger cPanel, and Linux VPS.
- Used AI-assisted development tools for API implementation, debugging, code optimization, refactoring, and troubleshooting while validating generated solutions before use.
- Troubleshooted runtime exceptions, database connection timeouts, and environment configuration issues during deployment.

Key Commercial Projects

- Furnivista POS** – Furniture Showroom ERP & Point of Sale

React 18, Node.js, Express, MySQL, SSE
- Built a multi-terminal POS supporting up to 5 concurrent cashier sessions, quotation-to-order conversion, and a 23-table relational schema.
 - Built a mobile floor-scanner pairing feature using 6-digit OTPs over SSE, letting staff use a phone camera as a wireless barcode scanner.
- Stepora Footwear POS** – Multi-Location Retail ERP

React 18, Node.js, Express, MySQL, Recharts
- Built multi-attribute variant matrices, an automated Buy-X-Get-Y discount engine, and loyalty-point tracking.
 - Built Recharts dashboards for inventory velocity and revenue reporting.
- Owner Keys** – Real Estate Listings Platform

Next.js 14, Node.js, MySQL, Redis, Razorpay
- Built a broker-free real estate listing platform with verified location mapping via OpenStreetMap Nominatim geocoding.
 - Built a QR-code-based digital contact feature and Redis-cached listing queries; integrated Razorpay for premium listing subscriptions.
- Kalepalli Jewellers** – Luxury Jewellery E-Commerce

React 19, TypeScript, Node.js, MySQL, PDFKit
- Built a live gold-rate pricing engine and server-side PDFKit tax invoice generation.
 - Implemented SMS OTP checkout and automated WhatsApp order dispatch.

AI-Assisted Engineering

- **AI Coding Assistants:** GitHub Copilot, Cursor, and Claude Code for code generation, optimization, debugging, refactoring, documentation, and test generation.
- **AI Models:** Hands-on experience with GPT, Claude, Gemini, and selected open-source models for software development and technical problem solving.
- **AI Agents:** Experience using AI coding agents to analyze existing codebases, trace frontend/backend issues, implement features, and iterate on solutions.
- **Validation:** Review and validate AI-generated code through testing, code review, API testing, security checks, and production verification rather than relying on generated code without validation.

Education

Bachelor of Technology in Computer Science and Engineering	<i>2023 – 2026</i>
Veltech University, Chennai, India	CGPA: 7.5 / 10
Diploma in Computer Science Engineering	<i>2018 – 2021</i>
Godavari Institute of Engineering and Technology, Rajahmundry, India	GPA: 7.2 / 10

Additional Information

Languages	English (Professional), Telugu (Native), Tamil (Conversational)
Keywords	Full-Stack, React, Node.js, Express, MySQL, REST API, SSE, Redis, Razorpay, Git, Linux VPS, Agile
